

Ideation Phase

Define the Problem Statements

Date	03 October 2026
Team ID	SWTID-2026-8426
Project Name	Import Data using Transform Maps
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - who are they?	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the care about - what are they trying to achieve?	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - what bothers them most?	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists - what needs to be solved?	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - how does it impact them emotionally?	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An HR team or administrator	Import employee data from the	The employee data has	Manual data loading and field mapping	Extra effort is required to migrate employee information and verify

	r who receives employee information in an external spreadsheet.	spreadsheet into ServiceNow accurately and efficiently.	to be loaded into an Import Set table and then mapped to the target Employee Test table using a Transform Map.	can take time and may cause incorrect or inconsistent data to be transferred.	that the imported records are accurate.
PS-2	A ServiceNow administrator managing employee records.	Import new and updated employee information repeatedly while keeping the employee table free from duplicate records.	Repeated spreadsheet imports may contain existing employee records as well as new or changed records.	Without proper duplicate handling, repeated imports can create redundant records; Coalesce is needed to update existing records instead of inserting duplicates.	Maintaining accurate and consistent employee records becomes more difficult and requires additional validation.
