Empathize & Discover

Date	03 October 2026
Team ID	SWTID-2026-8426
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Empathy Map Canvas

Primary user represented by the source workflow: administrator / HR user working with employee data imports, reports and dashboards.

EMPATHY MAP — IMPORT DATA USING TRANSFORM MAPS

Source-grounded Needs / Goals

- Import employee data into ServiceNow through a repeatable staging and transformation process.
- Verify that records are inserted or updated correctly.
- Prevent duplicate records when the same data is imported again.
- Monitor employee data through reports and the Employee Analytics Dashboards.

- Here the three Reports are added successfully by varying **Department , Location and List Report.**
- We can also restrict the **Users,Groups and Roles** From Share Option.

Conclusion:

1. This project successfully implemented an automated employee data management solution using ServiceNow Import Sets and Transform Maps, ensuring accuracy, efficiency, and data integrity throughout the employee onboarding and update process.
2. A key enhancement in this project was the use of Coalesce in the Transform Map. By enabling Coalesce on the Employee ID field, the system intelligently identifies existing employee records during every import. This prevents the creation of duplicate records and ensures that repeated imports update existing data instead of inserting redundant entries. As a result, the employee database remains clean, reliable, and consistent, which is critical in real-world enterprise environments where data may be imported multiple times from external systems.
3. In addition to data integrity, the project was extended with Reports and Dashboards to provide meaningful insights and real-time visibility into employee data and import activities. Custom reports were created to track:
